16	Long	3	340	100% surrounded by water is OB, there is also an added physical OB line marked with flags. If you throw and never re-establish in bounds on the other side by hitting land or a tree over land, then Drop Zone is Short Tee. And if you end up short in the very thick mud and your not surrounded by water but it's still too muddy to get to, then go back and get it in between rounds or when you're done. This is just a string for OB so if everyone on the card except the player (player vote no longer counts) thinks the disc is in then player is in bounds also vice versa is true.
17		3	325	Lake is OB.
